

LAKE PRESERVATION

Mike Wygand of the Browns Lake Sanitary District and his crew performed the first lake weed harvest from June 11-14, with an additional half day on June 17.

The big weed harvester cut the following areas:

Leach Beach, Aukes Beach, southwest bay, public beach, lagoon off the boat launch. The harvester also went around the whole lake three times cutting weeds from the piers out where water depth allowed.

Mike Wygand had the crew keep the public beach clean of floating weeds as they worked. They also cut weeds and removed floaters between multiple piers on the west and north shoreline and cut three navigation lanes in the southwest bay.

TOTAL TRUCKLOADS TO THE FARM – 22

TOTAL BIG WEED HARVESTER LOADS – 34
